A Specialist School in Science and Mathematics

10 January 2011

Dear Parents/Carers

ParentMail – Important Update

The School is now using ParentMail as the main form of communication to all parents. In addition, following circulation of letters via this system, copies will be added to the school website for viewing or downloading.

There are still a significant number of parents who are not registered to receive either emails or text messages from the School.

It is really important that any outstanding forms are returned. Parents/carers who are currently not registered cannot receive important information from the school.

The new system has been put in place to ensure letters are delivered home quickly and efficiently, text messages will also be sent as reminders for key events. The co-operation of parents in returning their information is imperative for the progress of more effective communication between the School and parents.

Additional forms are available to download from the school website.

If you do not wish to register your details for any reason please let the school know in writing. Paper copies of letters would then be sent by post.

Thank you for your co-operation.
