Dear Parents

**Re: Improving ICT at the Blue Coat School**

As part of our continued drive to provide our school community with improved facilities and resources, we have recently committed to improving our ICT resources including how we use them to support your children's learning and to communicate with you.

Over the last 4 months we have begun an extensive consultation that aims to establish a future vision about:

- What our specialist computer rooms should look like?
- How regular classrooms should be supported by ICT?
- What students and staff most need from ICT in shared spaces?
- How ICT should support teachers and support staff in offices and workrooms?
- How ICT can be best used to communicate with parents and facilitate your efficient engagement with school?

To date, our consultation has been wide ranging taking the views of students and staff through discussions, focus groups and questionnaires.

I write today to invite you to contribute to the consultation so that we can ensure that your views as parents are central to the vision we establish and seek to realise. We are particularly interested in your views about the use of technology to support:

- general communication about school
- specific communication about your child
- the organisation of information and events at the school
- the facilitation of financial transactions between parents and school.

We would be very grateful if you could spare 10 minutes to provide your views about these themes using this short [survey](#). We welcome your views over the next 2 weeks **up to 4.00pm on Friday 30 November 2018**.

Thank you in advance of support. We look forward to sharing our future ICT vision in the new year alongside an outline of how we hope to implement it.

Yours sincerely

Mr M A Pennington  
**Headteacher**
